# PASSWORDS MY MANTRA

I know some of you have heard me explain this analogy.

# PASSWORDS MY MANTRA

**I know some of you have heard me explain this analogy.**

**What happens if you lose your car keys?**

# PASSWORDS MY MANTRA

**I know some of you have heard me explain this analogy.**

**What happens if you lose your car keys?**

**You don't go anywhere.**

# PASSWORDS MY MANTRA

**I know some of you have heard me explain this analogy.**

**What happens if you lose your car keys?**

**You don't go anywhere.**

**Likewise, what happens if you lose your passwords?**

# LASTPASS

## What is LastPass?

**LastPass is a freemium password management service that stores encrypted passwords in private accounts.**

**LastPass is standard with a web interface, but also includes plugins for many web browsers and apps for many smartphones.**

# LASTPASS

**Password managers are an essential part of your online life.**

- **They create strong passwords that are difficult to crack**
- **They keep track of those passwords so you don't have to remember them**
- **They make it easy to change your passwords after a hack.**

# LASTPASS

## What we will cover today.

- **Why I choose LastPass**
- **My password process**
- **Create an account & download the app**
- **Your LastPass Vault**
- **Extensions for browsers**
- **Adding and saving sites**
- **LastPass for Android**
- **LastPass for iOS**
- **Generating a password**
- **Sharing & Families**
- **Creating Secure Notes**

# LASTPASS

**I have many sites I log into. It has become more and more important to **NOT** use the same password for all our site logins.**

**I needed a Password Manager. As of last night, I have 474 site logins & 9 Wi-Fi connections (under Secure Notes) .**

**A few are duplicates. I spend a few minutes each week finding, editing, correcting and eliminating duplicates & updating sites.**

**I like LastPass for a few good reasons:**

## WHY I CHOOSE LASTPASS

- **Price: \$24 per year (up last year from \$12) and still worth it**
- **Cross device accessibility.**
- **Solid Encryption as it leaves your device/system.**
- **Trust the owners of the service.**
- **Works on Android, Apple, Linux & Windows.**

# MY PASSWORD PROCESS

- **When I get to a new site and before I sign in/register, I plan my log in AND my password and write them down prior to filling in the Sign In process.**
- **Remember, sometimes a site will not accept a certain length of password or will require a certain combination that must be at least a certain of letters, numbers and/or characters.**
