About iMessage and SMS/MMS

Learn why some of your message bubbles are blue or green.

You can use the Messages app on your iPhone, iPad, or iPod touch to send messages. Those messages are sent as iMessage or SMS/MMS. Learn more about the difference between the message types.

iMessage

iMessages are texts, photos, or videos that you send to iOS devices and Macs over Wi-Fi or cellular-data networks. These messages are always encrypted and appear in blue text

SMS/MMS

If you aren't using iMessage, you can use SMS/MMS. These messages are texts and photos that you send to other cell phones or iOS devices. SMS/MMS messages aren't encrypted

VOICE DIRECTED MESSAGES

- DICTATION TO CREATE MESSAGE
- USE SIRI

- GROUP MESSAGES

- Send a group message on your iPhone, iPad, or iMAC

- With Messages, you can send a message to a group of people.

- You can also name your group, add or remove people from the group, mute notifications or leave the group.

SHARING PHOTOS

TEXT NEW PHOTO OR FROM YOU PHOTOS STORAGE

- <u>TAKE AND SEND PHOTO</u>
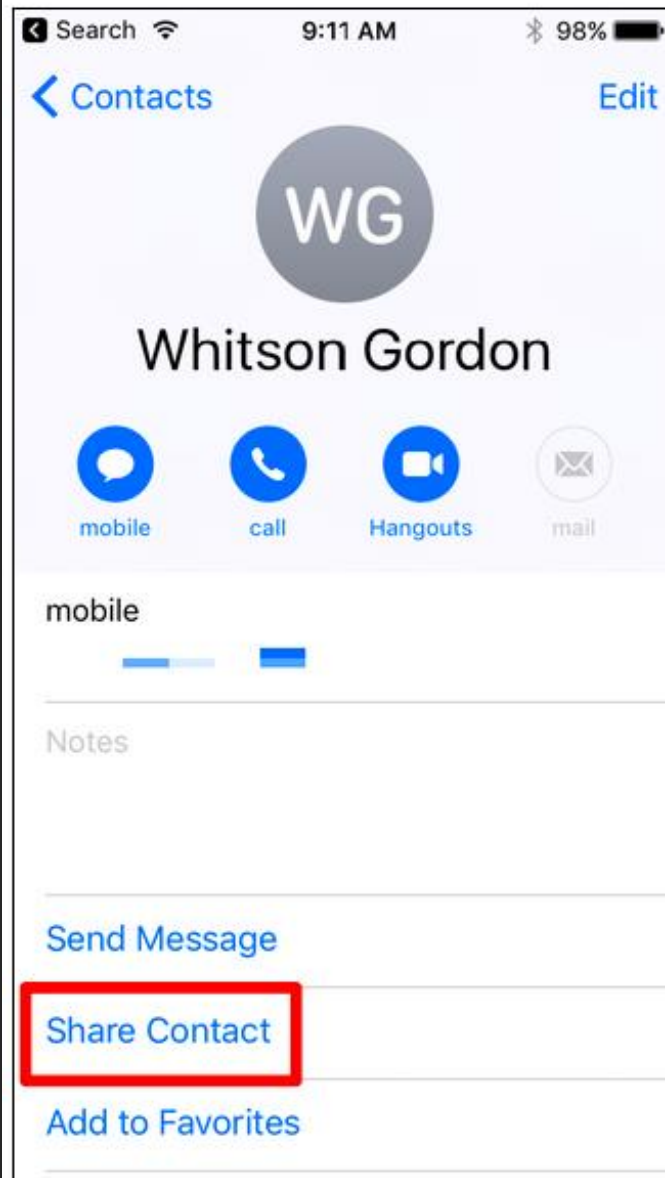

Send photo messages

1. In a message conversation, tap 📷.
2. Tap Camera.
3. Tap ◯ to take a photo. Then tap Done.
4. To send, tap ⬆. If you don't want to send the photo, tap ⊗ in the upper-right corner of the photo.

<u>SEND FROM PHOTOS STORAGE</u>

5. ADDRESS AND SEND

SHARING A CONTACT

A few options show up here, including AirDrop and various messaging options like
and Mail. Pick whichever one works best for you, but we're going to just share it in
message.

Here's how to send animated effects in the Messages app:

1. Open your Messages app and select the contact or group you want to message.
2. Type your text message in the iMessage bar as you normally would.
3. Tap and hold down the blue arrow until the "Send with effect" screen appears.
4. Tap Screen.
