How does T-Mobile 5G Home Internet work?

T-Mobile utilizes a wireless 5G Gateway to deliver 5G Home Internet to your home.

What is T-Mobile Home Internet?

T-Mobile's 5G Home Internet uses the same great network T-Mobile smartphones run on. Home Internet customers get service for just \$50/month with AutoPay, and no hidden monthly fees, no annual contracts, and no data caps.

The T-Mobile High-Speed Internet Gateway (which combines the capabilities of a router and a modem), is delivered directly to the home, and it's easy to install. Just plug it in, turn it on, and you're ready to go - streaming, zooming, and playing. During congestion, Home Internet customers may notice speeds lower than other customers due to data prioritization.

Do I have to have a voice line with T-Mobile to also sign up for a Home Internet plan?

No, a voice plan is not required to sign up for T-Mobile Home Internet.

Is the \$50 Home Internet plan tax exclusive or does the price include taxes and fees?

Most T-Mobile Home Internet customers are on tax inclusive voice plans or have Home Internet as the only lines on their account. This means that regulatory fees are included in the price of Home Internet.

Who is eligible for the \$50 unlimited Home Internet plan?

T-Mobile Home Internet eligibility is determined at the household level. Household eligibility is based off network capacity, which is expanding all the time, but can also change as more customers join T Mobile Home Internet.

Mobile customers with an eligible unlimited Home Internet or Small Business Internet line and at least one qualifying Magenta MAX or equivalent voice line can get their Home Internet or Small Business Internet service for just \$30 per month (with AutoPay) via \$20 monthly bill credit and \$5 AutoPay discount.

Do I have to have AutoPay to get this deal?

- AutoPay is not required to receive the promotion (via \$20 monthly bill credit), but you will need to sign up for AutoPay to get the \$30 price point (via \$20 monthly bill credit and \$5 AutoPay discount).
- If you do not wish to sign up for AutoPay or you have already reached your maximum number of AutoPay discounts (8), you'll receive Home Internet or Small Business Internet for \$35 per month (via \$20 monthly bill credit).

Is there a data cap on the unlimited Home Internet service?

Nope! There are no data caps on our unlimited Home Internet service.

What speeds can I expect from T-Mobile Home Internet?

T-Mobile 5G Home Internet customers see typical download speeds between 33-182 Mbps, which is great speed for streaming video, surfing the web, working from home and most types of online gaming. Speeds can vary depending on location, signal strength and availability, time of day, and other factors.

Can I purchase higher-speed service?

We don't offer tiered pricing based on speeds at this time. Customers automatically receive the best speeds available from the Home Internet service at their home address. As better speeds are available, customers will automatically experience them, at no additional cost. During congestion, Home Internet customers may notice speeds lower than customers using other T-Mobile services due to data prioritization.

What kind of upload speeds can I expect with T-Mobile Home Internet?

Typical upload speeds are between 6 Mbps and 23 Mbps.

Can I connect multiple devices to T-Mobile Home Internet at once?

Yes! You'll be able to use your T-Mobile Home Internet to connect your computer, phone, and numerous other devices in your home simultaneously.

What is Price Lock

Price Lock is our guarantee that we won't raise the price of your qualifying rate plan for new accounts. This Price Lock protection applies as long as the qualified plan is not removed or altered by the primary account holder.

What is Test Drive, and who is eligible?

Any customer who activates T-Mobile Home Internet or Small Business Internet on a qualifying plan within the promotional window and schedules cancellation of service within the first 15 days of activation will qualify for Test Drive.

How-To: Set Up High Speed Internet Gateway | T-Mobile

It is easy to set up using an app on your phone or PC. I have the Modem in the front room of my house, by a window. I am using an ORBI router, with an ORBI satellite in my kitchen so I can have an ethernet connection in my kitchen and another satellite in my front hall. I have one extender in the bedroom. I have Rokus on 4 TVs. I also have my security cameras hooked up via Wi-Fi.
